Funding

This work was supported by the Fundação de Amparo à Pesquisa do Estado de Minas Gerais (FAPEMIG) through project BPD-01045-22, and by the Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES), which supported the master's phase from which this research line originated. The doctoral continuation of the first author is supported by the Conselho Nacional de Desenvolvimento Científico e Tecnológico (CNPq). A. P. de Paiva acknowledges CNPq research productivity grant 312844/2023-9. The funders had no role in the design of the study, in the analysis or interpretation of the data, or in the decision to submit.

Acknowledgements

The authors thank the Universidade Federal de Itajubá for institutional support. The computational study was executed on a single computer; no external compute allocation was used.

Declaration of competing interest

The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper. The relationship of this work to the authors' earlier publication in this journal and to the first author's master's dissertation is disclosed to the editor in the cover letter and in the self-overlap assessment.

Code availability

The code, manifests, aggregated tables, statistics and figures are in the public repository `https://github.com/caioribeiro99/doe_nbi_hpo_project`, whose name is withheld from the anonymized manuscript.
